**RE: Notification Pertaining to Tennessee Multi-Sector General Permit – Facility Tracking
No. TNR056538**

Dear Ms. Wilbert:

The purpose of this letter is to officially notify the Tennessee Division of Water Resources that the BlueKnight Energy Partners (BKEP) Materials, LLC, Memphis Asphalt Terminal intends to continue to operate under its existing Tennessee Multi-Sector General Permit, Facility Tracking Number TNR056538. We are formalizing notification to the Tennessee Division of Water Resources because it is our understanding that although the Tennessee Storm Water Multi-Sector General NPDES Permit for discharges of Storm Water associated with Industrial Activity (TMSP) expires May 14, 2014 (with a renewal application deadline of November 14, 2013); it is the current guidance of the Tennessee Division of Water Resources that we do not yet submit an application for renewal, but continue to operate under the existing general permit until further notice from your Division. Your specific guidance regarding this matter was clarified with our consultant (Maggie Bierbaum with One World Resource, LLC) in an email correspondence dated October 21, 2013; and is documented as follows:

"...If the facility's operation remain the same and the TMSP has expired, the facility needs to continue with the terms and requirements of the expired TMSP until further notice from the Division."

It is our understanding that issuance of the new TMSP is pending and no further steps are required until we are notified. If there are any changes with regards to this matter or we are misinterpreting your guidance, would you please contact me right away at 303.249.3675 or msattler@bkep.com. Thank you for your time and assistance.

Sincerely,

Mike Sattler
EHS Manager
